

E-Commerce Website Redesign

Quench

Janet Brandon

About

Quench is an incredible local startup in the Edmonton community, bringing engineering ingenuity and an entrepreneurial mindset together to create a beautiful and simple solution for the busy plant parent. Quench's plant moisture meter is engineered to tell you when to water your plants. Each device plays a unique tone, giving your plants their own unique voice.

This project is a redesign of their current info-focused website into a more revenue building, e-commerce platform, including the design of a brand style and tone.

All Round Gothic

Nothing you could do

Typography

Logo

A reimagining of the original logo seamlessly brings an iconic shape of nature into the artistic style of the font. This small, subtle change allows the brand to speak more to the types of products it produces.

Concept

Quench's branding style and tone incorporates a fun and joyful attitude. This is achieved through soft circular shapes and rounded corners. Each element on any given page has room to breathe, is purposefully placed, and leads your eye to the most important information first.

Throughout this design, the user experience comes first, using proven methods to build trust, loyalty, and excitement for the brand.

Never forget to water
your plants again!

shop now

Thriving houseplants made easy

Quench lets your plant tell you when it needs water. All you need to do is listen! By letting Quench do the hard stuff for you, you can experience more of the joys of owning plants, and less of the frustrations.

Adjust the depth to suit different types of plants

For dry-loving plants, insert Quench deeper into the soil, and for plants that prefer the soil to stay moist, simply insert Quench shallower.

Every Quench plays a unique tone

Each unique tone give your plants a unique voice. At night, instead of making a sound, Quench lights up red so it will never disturb your sleep.

Testimonials

We love Quench! But don't just take it from us, see what our customers are saying:

“

I am so happy to have Quench to help me water my plants. No more dead plants in this house!
